

Fondarex VACUPAC CHILL 300/25 vacuum system ZU2287, used

manufacturer : Fondarex

Product number:
ZU2287

Description

For Sale: Used Fondarex VACUPAC CHILL 300/25 Vacuum System - Excellent Condition

We are offering a well-maintained, used **Fondarex VACUPAC CHILL 300/25** vacuum system, ready to support your industrial vacuum and drying needs with reliability and performance.

Outstanding Performance & Reliability

This **Fondarex VACUPAC CHILL 300/25** vacuum system delivers industry-leading performance with a balanced combination of strong suction power, high airflow, and efficient material handling. With a **suction capacity of 25 m³/h and a 300 litre tank**, it's perfectly suited for demanding applications in plastics processing, extrusion, recycling, injection molding, and other industrial processes.

Advantages of Fondarex Vacuum Systems

Fondarex vacuum technology stands out worldwide thanks to:

- **High Efficiency & Energy Savings**

Fondarex systems are engineered for optimal energy use, reducing operating costs without sacrificing performance.

- **Superior Drying & Processing Consistency**

Achieve reliable drying and material conditioning with precise vacuum control, improving product quality and process stability.

- **Robust Build Quality**

Designed with industrial-grade components and durable construction, Fondarex units withstand continuous use in tough production environments.

- **Low Maintenance & Long Service**

Life Easy-access parts and smart system design minimize downtime and service costs, maximizing uptime and productivity.

- **Flexible Integration**

This VP CHILL unit interfaces seamlessly with existing production lines, making it ideal for upgrades or expansions.

Vakuumsystem

Manufacturer	Fondarex
Model	VACUPAC CHILL 300/25
Baujahr	2012
Tank	300 l
Suction capacity	25 m ³ /h, 0,5 bar
DCM	up to 800 ton

Remarks

Delivery time	immediately
Price	on request
