

StrikoWestofen MH II-T 6000/3500 G-eg melting and holding furnace O1861, used

manufacturer : Striko Westofen

Product number:
O1861

Description

Powerful, reliable, and ready to boost your production. The MH II-T 6000/3500 G-eg is a robust gas-fired melting and holding furnace designed for consistent batch quality and efficient operation. This unit comes with a charging machine for seamless integration into your casting process.

Key benefits

- Efficient natural gas heating for economical operation
- High throughput: up to 3,500 kg/h melting capacity
- Generous hold capacity (6,000 kg) for flexible production
- Includes charging machine for streamlined workflow
- Proven StrikoWestofen reliability and long service life
- Suitable for continuous production with straightforward maintenance

Advantages of the MH II-T 6000/3500 G-eg family

- Energy-efficient gas-fired design with strong heat distribution
- Precise temperature control for consistent alloy quality
- Robust construction and long-term durability
- Integrated charging/holding features to minimize handling steps
- Flexible batch sizes and quick heat-up for responsive production
- Mature, widely deployed technology with strong service support

Melting and holding furnace

Manufacturer	StrikoWestofen
Model	MH II-T 6000/3500 G-eg
Capacity	6000 kg
Melting capacity	3500 kg/h
Heating	natural gas
Year of Manufacture	2016
Charging unit	
Load capacity	kg
Comments	for aluminium
Delivery time	immediately
Price	on request
