

ABK SP30-4-300 deburring machine EP2003, used

manufacturer : ABK

Product number:
EP2003

Description

Are you looking for a precise, robust and ready-to-use solution for your mass production or toolmaking? We offer a high-quality ABK SP30-4-300 trimming press from the year of manufacture 2025, which is available immediately. With its enormous pressing force and generous dimensions, this machine is ideal for demanding applications.

Technical specifications at a glance

- Machine type: Hydraulic trimming press / straightening press
- Model: ABK SP30-4-300
- Year of manufacture: 2025 (As-new condition / Available immediately)
- Press force: 300 tonnes
- Column clearance: 3000 x 2300 mm
- Clamping area (table/ram): 3000 x 3000 mm

The benefits of the ABK SP30-4-300

- Maximum flexibility: The generous column clearance of 3000 x 2300 mm and the large clamping area of 3000 x 3000 mm enable the machining of large-format components, heavy tools and complex geometries.

- High productivity & precision: With a powerful 300-tonne pressing force, the press guarantees precise results when deburring, straightening or forming components.
- No waiting times: As this is a machine manufactured in 2025 and available for immediate delivery, the usual long lead times associated with machine manufacturing are eliminated. You can expand your production straight away.

Applications

The ABK SP30-4-300 is ideal for:

- The precise deburring and finishing of castings
- Tool and mould making
